2400 mm Opening	\$500.00
2700 mm Opening	\$525.00
3000 mm Opening	\$635.00
Drop Latch	\$ 45.00

Installation

Important: The actual gate length is 50 mm shorter than the listed size. This means that the gate fits an opening of the size mentioned on the list. For example; a 2.4 m gate is 2350 mm long and gate posts need to be set 2400 mm apart.

1. Footings. Post holes should be a minimum of 400 mm dia. x 1200 mm deep. Concrete is recommended.
2. Install Posts using a level to ensure they are the same height and stand true vertically. Leave concrete to set for 24 hours.
3. Drill 2 x 20 mm dia. holes @ 990 mm centres to house the thru post gudgeons. The bottom hole should be a minimum of 130 mm above driveway level.
4. Place the lower gudgeon in the hole and the upper gudgeon (pin facing down) into the top hinge, and, holding the gate, guide the gudgeons through the post and fix in position with the nuts and washers provided.
